The following page(s) are extracted from multi-page Kuhnke product catalogues or CDROMs and any page number shown is relevant to the original document. The PDF sheets here may have been combined to provide technical information about the specific product(s) you have selected.

Hard copy product catalogues, and CDROMs have been published describing Kuhnke Pneumatics, Solenoids, Relays and Electronics; some divided into different books. A list of current publications is available on this web site or from our sales offices. Some may be available for download, but as substantially larger files.

Important Note

The information shown in these documents is for guidance only. No liability is accepted for any errors or omissions. The designer or user is solely responsible for the safe and proper application of the parts, assemblies or equipment described.
Miniature Pressure Regulator

The miniature Series 50 regulator provides regulation of air pressures from 0 to 115 PSI. The regulator is available in both relieving and non-relieving versions. Housing is nickel-plated brass.

The regulator is supplied with a panel nut for mounting in a 1 inch diameter hole. A large brass knob provides for adjustment throughout the regulator’s range. A setting lock nut is included to prevent tampering after adjustment. The regulator has a third port for connection of a pressure gauge. Primary and secondary ports are 180° apart on the side of the regulator body.

Several adjustment ranges are available for close regulation in most applications. Special designs are available.

Technical Specifications

Op. Pressure:
0-145 PSI

Regulator Range:
0-115 PSI

Porting:
1/8 G or NPT

Flow Rate:
Dependent on regulator model. See charts.

Media:
Filtered air.

Types:
Relieving or non-relieving.
Single stage, diaphragm/spring construction.

Response Time:
(Dependent on secondary volume). Response average: 45ms at 20% loss of secondary air pressure; 100ms at 50% loss of secondary air pressure.

Adjustment:
Knob Adj. Equipped with locking nut to prevent tampering after setting is made.

Materials:
Brass housing nickel-plated, stainless and brass interior parts, Buna N seals.

Operating Ambient:
0° C to +60° C (32° F to 140° F)

Dimensions:
Height – 2 5/16”
Width – 1 3/16” Square
Weight – 9 1/2 ozs.

Drilling Plan:
Mounts in 1” dia. hole. Equipped with mounting nut. Behind panel depth - 11/16”.

Accessories

An ‘L’ shaped bracket catalog number 48255-100 can be used to mount the regulator on a flat surface using (2) 10-32 threaded holes on the rear of the unit.

Operation

Relieving type regulators allow excessive pressure on the secondary side of the regulator to bleed off to the atmosphere, helping maintain steady pressure. Non-relieving types are used where pressure build up is not a concern as in air motors, or air gun applications etc.

Flow Chart

Miniature regulators are not intended to be used as primary line regulators.
