The following page(s) are extracted from multi-page Kuhnke product catalogues or CDROMs and any page number shown is relevant to the original document. The PDF sheets here may have been combined to provide technical information about the specific product(s) you have selected.

Hard copy product catalogues, and CDROMs have been published describing Kuhnke Pneumatics, Solenoids, Relays and Electronics; some divided into different books. A list of current publications is available on this web site or from our sales offices. Some may be available for download, but as substantially larger files.

Miniature Screw Driver Adjusted Pressure Regulator

The Series 48 miniature regulator has characteristics similar to the Series 50 miniature regulator. The unit, however, is specially designed for systems where constant adjustment of pressure is not necessary.

The Series 48 regulator is designed for mounting in panel interiors. Two (10-32) tapped holes are provided in the side of the housing for attachment to panel or mounting brackets. Ports (2) are 180° apart on the sides of the unit housing.

A variety of regulation ranges is available to suit most applications. Special designs are available.

Technical Specifications

Op. Pressure: 0-145 PSI
Regulator Range: 0-75 PSI
Porting: 10-32 (M5) or 1/8
Flow Rate: Dependent on regulator model. See chart.
Media: Filtered Air.
Types: Relieving or non-relieving. Single stage, diaphragm/spring construction.

Response Time: (Dependent on secondary volume).
- Response average: 45ms at 20% loss of secondary air pressure;
- 100ms at 50% loss of secondary air pressure.
Adjustment: Screw driver. Equipped with locking nut to prevent tampering after setting is made.
Materials: Brass housing (nickel plated), stainless and brass interior parts, Buna N seals, polyamide cover.
Operating Ambient: 0°C to +60°C (32°F to 140°F)

Mounting: Via (2) 10-32 tapped holes on side of housing. Mounting bracket available.

## Accessories

An ‘L’ shaped bracket catalog number 48255-100 can be used to mount the regulator on a flat surface using (2) 10-32 threaded holes on the rear of the unit.

## Operation

Relieving type regulators allow excessive pressure on the secondary side of the regulator to bleed off to the atmosphere, helping maintain steady pressure. Non-relieving types are used where pressure build up is not a concern as in air motors, or air gun applications etc.

## Flow Chart

![Flow Chart]({{ 'chart' | file }})

Approximate Secondary Flow (Liters per Minute)

(1 Bar = 14.5 PSI; 1 liter = .03531 cubic feet)

(Primary Pressure Set at 10 Bar)
